Series 255 Open Front Desk with Series 250 Chair.

Series 256 Lift Lid Desk with Series 250 Chair.

Series 257 Study Desk with Series 250 Chair.

Series 255—OPEN FRONT DESK—Aside from its contemporary lines so completely in harmony with modern school architecture, this desk has practical aspects that make it outstanding. The sturdy frame is a rigid, welded structure in itself, upon which the one piece steel book box is mounted. The braces are placed at an angle to permit unhampered normal foot movements eliminating any uncomfortable feeling of restraint. Self leveling, rubber cushioned glides protect classroom floors. The desk top, available in either natural finished plywood or Norcolite plastic top plywood, is set at a comfortable 4° angle. The pencil trough is located at the front edge of the book box. The Model 255 is available in 5 sizes to suit all grades from kindergarten through college.

Series 256—LIFT LID DESK—The lift lid top is mounted on the same strong structure as the Model 255. The book box is of one piece embossed steel construction, with pencil trough conveniently located at the front upper edge. The table top, of either plywood or with Norcolite plastic surface is of one piece construction set at 4° angle and with two friction hinges that support the top in any position. These hinges have adjustable tension and positive stops. A simple and convenient leveling device permits the desk top to be raised to a horizontal position when desirable. Clean out holes are provided. This Lift Lid Desk, too, is furnished in 5 desk heights.

Series 257 and Series 258—ART & BOOKKEEPING DESK—Designed for the study room, bookkeeping or art classes, this desk has no book box and the desk top, mounted directly to the tubular steel frame, is set in a horizontal plane. It is available with the standard 18″ x 24″ desk top in the Series 257, or with the large 20″ x 28″ desk top in the Series 258, for use where greater work surface is required. The Series 258 Tables may be grouped to form a large work surface. Either plywood or Norcolite desk tops may be had in both series.

BASIC CHAIR

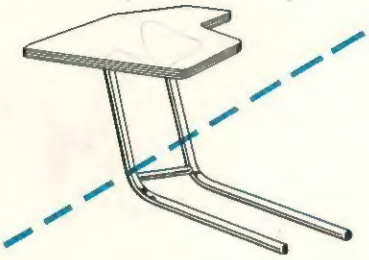
U. S. Patent Office
JUN 4 1956
Design Division

Chair Desk, Tablet Arm. Chair Arm and Wire Book Rack are all bolted to the basic chair frame.

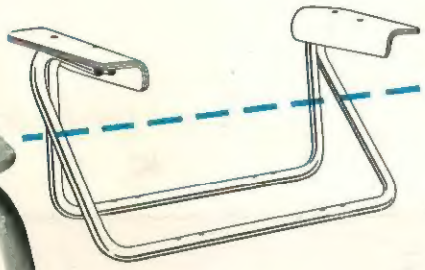
Modernline Basic Ch
fectly, convenient anc
for storage or when

The Norcor Modernline embodies a new spirit in school furniture! Here is not only comfort and good posture but a new dynamic appearance, new color and styling, perfectly in harmony with modern educational theories and practices. Gone forever is the stodgy regimentation of yesterday's drab classrooms. Instead this Modernline school furniture creates a spirit of freedom, of homelike informality in which the pupils mind joyfully embarks upon the great adventure of learning. Even the teacher can become inspired in a Modernline furnished classroom—its color and smart, functional lines help make both teaching and learning one of life's most rewarding experiences.

Modernline Tablet Arm Chair



MODERNLINE TABLET ARM CHAIR—This tablet arm attachment, bolted to the basic Modernline chair, makes one of the most convenient and practical tablet arm chairs ever designed. Notice the unique shape of the tablet arm and the perfect "writing angle" at which it is placed. It offers not only a full generous writing area, but an arm rest as well. A student can sit facing squarely to the front as he writes on this tablet arm with the teacher or blackboard always in full view without turning his head from his written notes. Right or left hand tablet arms are available, in both plywood and Norcolite plastic top.



MODERNLINE ARM CHAIR—Merely by attaching the arm rest assembly to the basic chair frame we have a handsome, contemporary teacher's chair or utility chair, comfortable, good-looking.

Modernline Arm Chair

NORCOR MODERNLINE BASIC CHAIR—The pleasing, contemporary appearance of this basic Modernline chair is new proof that the purely functional can be beautiful, for comfort and good posture were the first consideration in the design of this chair. The seat area, position and relation to the back rest are all in accordance with good posture standards. The tubular steel frame is welded together to form an integral unit. Tablet Arm. Arm Rest and Wire Book Rack are all designed to attach to this basic chair structure. Eight seat heights are available to accommodate pupils of all ages from the toddler to the adult.

MODERNLINE CHAIR DESK—The basic structure of the Modernline Chair Desk is similar to the basic Modernline with one exception. To provide the maximum stability the leg of the chair under the desk is extended forward. Trapezoidal in shape, the chair desk permits easy ingress and egress from the chair.

The welded wire book rack, shown in this illustration, has both front and side opening, and may be attached to any Norcor Modernline chair frame. The Modernline Chair Desk provides a generous 18" x 24" working surface. Either plywood or Norcolite plastic top are available.

School furniture that keeps pace with modern education

NORCOR

Modernline TEACHER'S DESK

The desk your teachers will be proud to use

Here is the desk that will raise a teacher's morale! It is just as handsome as the rest of the Norcor Modernline furniture, and it is an efficient teachers' work center as well! That beautiful natural wood-grained top is glass smooth and hard, and it will stay that way for it is constructed of Norcor 13 ply plywood with Norcolite Plastic Top.

The pedestal has a big, roomy top drawer and a bottom file drawer for records and papers. There's a roomy center drawer, too, and they are all suspended in steel channels for easy operation. It can be had with or without the dignity panel, which, with the legs can be finished to match or contrast with the other Modernline furniture in the room.

SPECIFICATIONS

TOP—30" x 48", 13 ply, plywood, Norcolite Plastic faced.

DRAWERS—Norcolite Plastic faced, ¾" oak sides and back, suspended in steel channels, with stops and lock.

SIDE PANELS—20 Ga. steel, finished in baked enamel.

PEDESTALS—1¼" O.D. 16 Ga. Tubular Steel with rubber cushioned, case hardened, polished steel glides.

COLORS—Metal; Blue-Gray, Coral, Turquoise, Chrome (pedestals only)
